1   Contents of the Consignment

This service pack provides important and necessary changes for DIGSI 4.60. These changes concern all DIGSI components, in particular the remote control via modem and the IEC 61850 System Configurator. Furthermore, we deliver additional device drivers on this CD. These drivers apply to devices with the firmware version 4.60.

2   Software Requirements

DIGSI 4.60 has to be installed on your PC.

3   Installation

Note:

Depending on the configuration of your operating system you require full administrator rights for installation. Before installing the service pack you have to terminate DIGSI.

Installation

- Insert the CD-ROM "Program" into the CD-ROM drive of your operating PC. Normally, the DIGSI set-up menu is now automatically opened.

If this is not the case:

- Click the Windows Start menu and select the "Run..." item.

- Enter the following text in the text box:
  x:\Setup.exe
     (x stands for the drive letter of your CD-ROM drive).

- Click on OK.

- Select the language first, then click on "DIGSI 4.60 Service Pack 1".

- Follow the on-screen instructions of the setup program.

- The DIGSI set-up menu allows you to install additional device drivers. These drivers apply to devices released after DIGSI 4.60. If you want to install these drivers, click on "SIPROTEC 4 Device Drivers (V4.6)". You will find the appropriate manuals under "Device Manuals (V4.6)".

- Click on "Utilities" to find information on the SIPROTEC Web Monitor, a feature, now implemented in many SIPROTEC 4 devices.
  A reminder: The Web Monitor enables the display of parameters, data and measured values of SIPROTEC 4 devices. For this, it uses Internet technology. The display is based on a Web Browser. A special operating program (e.g. DIGSI 4) is not required.

4 How to check if service pack 1 is installed

To check if service pack 1 is installed, proceed as follows:

• In DIGSI Manager, select "About..." from the "File" menu. In the second line, you see in addition to "DIGSI 4 - Version: V04.60" the information "SP1".

5 Uninstalling the Program

It is neither possible nor necessary to uninstall the service pack.

6 Known Problems

❑ Opening manuals from the DIGSI-CD (Windows 98 and Windows ME only)

Situation:
Using Windows 98 or Windows ME it is not possible to open the manuals with Acrobat Reader 6.0 (provided on the DIGSI CD).

Caution:
For Windows 98 or Windows ME, use Acrobat Reader 5.0 (available from http://www.adobe.com) to view the manuals.

7 Other Information

Internet:

To be always up to date in the future, please use the offer at our download website in the Internet at the address:

http://www.siprotec.de   (in German)
http://www.siprotec.com   (in English)
