1) Typ. operating range limit: min./max. attainable range without performance reserve

- 2) Operating range: recommended range with performance reserve
- 3) Measurement field lengths and beam spacings specified in fixed rasters, see ordering table
- 4) Cycle time = beam number x 0.01 ms + 0.2 ms. The minimum cycle time is 1 ms.
 5) Dry cold, non-condensing: detection of transparent media down to -20°C.
- 5) Dry cold, non-condensing; detection of transparent media down to -20°C.
 6) 1=transient protection, 2=polarity reversal protection, 3=short circuit protection for all outputs,
- must be provided with external protective circuit for inductive loads.

Remarks

- Approved purpose: This product may only be used by qualified personnel and must only be used for the approved purpose. This sensor is not a safety sensor and is not to be used for the protection of persons.
- The functional earth must be connected to the sliding block connections.
