

**Model Number**

**RLK39-54/31/40a/116**

Retroreflective sensor with polarization filter  
with terminal compartment

**Features**

- Glare protected with polarization filter
- Visible red light
- Light/dark ON, switchable
- Protection degree IP67

**Dimensions**

**Electrical connection**

Release date: 2010-08-04 15:26 Date of issue: 2011-07-14 088822\_eng.xml

**Technical data****General specifications**

Effective detection range	0 ... 7 m
Reflector distance	0.1 ... 7 m
Threshold detection range	9 m
Reference target	H85 reflector
Light source	LED red
Light type	modulated visible red light
Approvals	CE
Ambient light limit	10000 Lux

**Indicators/operating means**

Function display	LED yellow: switching state LED red: pre-fault indication
Controls	sensitivity adjustment
Controls	Light/Dark switch

**Electrical specifications**

Operating voltage	$U_B$	12 ... 240 V DC 24 ... 240 V AC (50 ... 60 Hz)
Ripple		10 %
No-load supply current	$I_0$	$\leq 35$ mA
Power consumption	$P_0$	$\leq 3$ VA
Time delay before availability	$t_v$	$\leq 50$ ms

**Output**

Switching type	light/dark on	
Signal output	1 relay output	
Switching voltage	$\leq 240$ V AC	
Switching current	max. 3 A	
Switching frequency	$f$	$\leq 25$ Hz
Response time		$\leq 20$ ms

**Standard conformity**

Standards	EN 60947-5-2
-----------	--------------

**Ambient conditions**

Ambient temperature	-25 ... 55 °C (-13 ... 131 °F)
Storage temperature	-40 ... 70 °C (-40 ... 158 °F)

**Mechanical specifications**

Protection degree	IP67
Connection	terminal compartment PG9, $\leq 2.5$ mm <sup>2</sup>
Material	
Housing	PBT
Optical face	PMMA
Mass	110 g

**Compliance with standards and directives**

Directive conformity	
EMC Directive 2004/108/EC	EN 60947-5-2

**Approvals and certificates**

CCC approval	Certified by China Compulsory Certification (CCC)
--------------	---

**Curves/Diagrams****Accessories****OMH-RL39**

Mounting bracket for RL39 series Sensors

## Additional Information

### Conventional use:

The reflex light beam switch contains the emitter and receiver in a single housing. The light from transmitter is beamed back from a reflector to the receiver. If an object interrupts the light beam the switching function is initiated.

### Mounting instructions:

The sensor can be fastened over the through-holes directly or with the included mounting bracket.

The base surface must be flat to avoid distorting the housing during mounting. It is advisable to secure the bolts and screws with washers to prevent misalignment of the sensor.

### Instructions for adjustment:

Connect the sensor to operating voltage, the LED green lights up constantly.

Mount suitable reflector opposite light beam switch and align roughly.

The exact adjustment takes by swivelling the sensor horizontally and vertically. With optimum light reception the yellow LED lights up constantly. In case of bad alignment, the red LED lights up.

### Object detection check:

Move the object into the light beam. If the object is recorded, the yellow LED goes off. If it isn't going off, reduce the sensitivity with the potentiometer until it goes off. It should light up constantly again when the object is removed.

The red LED lights up if reception deteriorates (e.g. soiled lenses or by maladjustment) and when falling short of the stability control.

### Illustration:

We recommend that you clean the optical interfaces and check the plug-in connections and screw connections at regular intervals.
