

Model Number

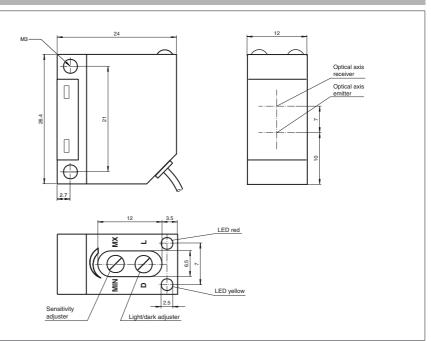

ML5-6/30/115a

Retro-reflective sensor with 2 m fixed cable and 3-pin, M8 cable connector

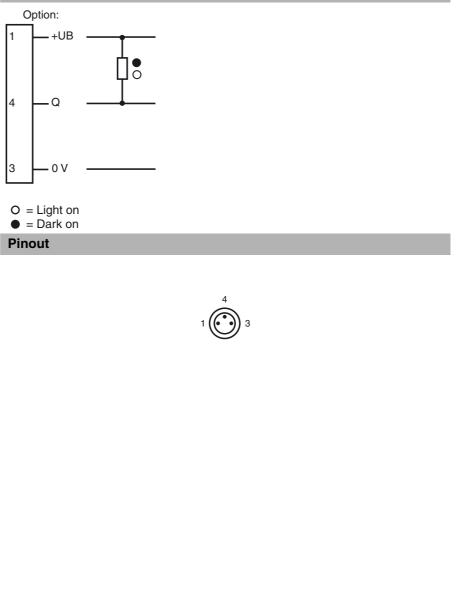

Features

- Miniature design
- Infrared light design
- Light/dark ON, switchable
- Pre-fault indication
- Protection degree IP67
- Thru-holes for screw mounting

Dimensions

Electrical connection

Release date: 2010-05-03 10:46 Date of issue: 2010-05-03 801015_ENG.xml

Technical data			Accessories
General specifications			OMH-ML5
Effective detection range		0 2000 mm	
Reflector distance		0.01 2 m	Mounting aid
Threshold detection range		2500 mm	
Reference target		H50 reflector	
Light source		LED, Infrared 950 nm	
Light type		modulated infrared light	
Approvals		CE, cULus Listed 57M3 (Only in association with UL Class 2 power supply; Type 1 enclosure)	
Ambient light limit		\leq 20000 Lux sun light \leq 5000 Lux halogen light	
Indicators/operating means			
Function display		LED yellow: switching state LED red: pre-fault indication	
Controls		light/dark switch, sensitivity adjuster	
Electrical specifications			
Operating voltage	UB	10 30 V DC	
Ripple		10 %	
No-load supply current	I ₀	≤ 30 mA	
Output			
Switching type		light/dark on, switchable	
Signal output		1 NPN output, short-circuit proof, protected from reverse pola- rity, open collector	
Switching voltage		max. 30 V DC	
Switching current		max. 200 mA	
Voltage drop	Ud	≤ 2.5 V	
Switching frequency	f	≤ 500 Hz	
Response time		1 ms	
Standard conformity			
Standards		EN 60947-5-2	
Ambient conditions			
Ambient temperature		-25 70 °C (-13 158 °F)	
Storage temperature		-25 70 °C (-13 158 °F)	
Mechanical specifications			
Protection degree		IP67 according to EN 60529	
Connection		2 m, 3 x 0.14 mm ² , PUR cable	
Material			
Housing		Polycarbonate	
Optical face		РММА	
Mass		approx. 45 g	
Compliance with standards a ves	nd directi	-	
Standard conformity			
Standards		EN 60947-5-2	
Approvals and certificates			
UL approval		cULus Listed, Type 1 enclosure	
0

Additional Information

Conventional use:

The reflex light beam switch contains the emitter and receiver in a single housing. The light from transmitter is reflected back to the receiver by a reflector. If an object interrupts the light beam the switching function is initiated.

Mounting instructions:

The sensor can be fastened over the through-holes directly or with a mounting bracket (not included in scope of supply). The base surface must be flat to avoid distorting the housing during mounting. It is advisable to secure the bolts and screws with washers to prevent misalignment of the sensor.

Instructions for adjustment:

Connect the sensor to operating voltage, the LED green lights up constantly.

Mount suitable reflector opposite light beam switch and align roughly.

The exact adjustment takes by swivelling the sensor horizontally and vertically. With optimum light reception the yellow LED lights up constantly. In case of bad alignment, the red LED lights up.

Object detection check:

Move the object into the light beam. If the object is recorded, the yellow LED goes off. If it isn't going off, reduce the sensitivity with the potentiometer until it goes off. It should light up constantly again when the object is removed.

The red LED lights up if reception deteriorates (e.g. soiled lenses or by maladjustment) and when falling short of the stability control.

lustration:

We recommend that you clean the optical interfaces and check the plug-in connections and screw connections at regular intervals.
